Subject: UK COSMIC SIG - May NewsLetter - Core-Group COSMIC-DevOps

Dear All,

Latest Event:

I am attaching in <https://telmaco.com/cosmic-devops.html> a one page note broadly describing the gap between DevOps metrics and COSMIC metrics. This Note is open for discussion. Please download it and come to discuss it during our next virtual meeting. See below.

Launching Stage – In Progress (Review: 10/06/2019):

Three main tasks pertinent to the launch

- Communication infrastructure: UKMIS chat-Room completed, SocMed activated, Co-ordination centre now building up
- Invitation of participants: In progress. **Offer to join is still available**

And

- Strawman study plan: A few ideas are merging but will need reality checking.

Next Stages :

- Review of the Launch on the 10th June 2019
- Pre-study Plan
- Preliminaries

I would appreciate it if you could:

- send me any comment useful for this study;
- recommend any potentially interested participant, and;
- point any orientation this study should take to satisfy your needs ... or ... curiosity.

Core-Groups of UK COSMIC SIG

Please create your Core-Group on a topics that meets your Interest, and, in a DevOps spirit, share it with the other core-groups.

UK COSMIC SIG needs as many relevant activities as possible.

The key word of a SIG is Interest. All the best.

Measuring DevOps: The Key Metrics That Matter - Electric Cloud

Naturally as a grown up Agile, DevOps seems to prefer the 'process' metrics as distinct from the 'product' metrics as we do in COSMIC. But we need the process because we want the product. Therefore, the interdependence may be identified.

Next Meeting of the COSMIC-DevOps

The next and first meeting of this Core-Group's Members and sympathisers will take place on the **Friday 21st June 2019**.

This will be a virtual meeting taking place in 2 sessions morning (from 10:00 till 11:00 hours) and evening (from 21:00 till 22:00 hours).

Agenda:

Both sessions: Priority will be given to your return from experience with a view of sharing your metrics. Otherwise:

- Morning: From the DevOps "Plan" to "Release" what are the possible scenarios of a COSMIC measure?

- Evening: Recap from the morning, then which scenarios complete DevOps metrics?

Venue:

Skype: bernard.londeix

Or, my **Zoom** (Personal Meeting Room) <https://us04web.zoom.us/j/5902859937>

We hope to see you there.

Kind regards,

Bernard
